

1. Landing Page Component						
Test Case ID	Test Case Description	Test Data	Test Steps	Expected Test Result	Actual Test Result	Status Pass/Fail
LP_001	Verify that the landing page loads successfully	N/A	1. Open the application URL 2. Observe if the page loads completely	The landing page should load with all UI elements visible	All UI element are visible and correctly displayed	Pass
LP_002	Verify that the "Get Started" button redirects to the registration page	N/A	1. Click on the "Get Started" button	The user should be redirected to the registration page	User is successfully redirected to the registration page.	Pass
LP_003	Verify that the login button redirects to the login page	N/A	1. Click on the "Login" button	The user should be redirected to the login page	User is successfully redirected to the Login page.	Pass
LP_004	Verify the presence of branding elements	N/A	1. Check if the StockSync logo is displayed	The StockSync logo should be visible	The StockSync logo is visible as expected	Pass
LP_005	Verify responsiveness on different screen sizes	N/A	1. Open the landing page on mobile, tablet, and desktop views	The page should adjust correctly for all screen sizes	The Page adapt correctly without any layout issue.	Pass
LP_006	Verify navigation menu functionality	N/A	1. Click on different navigation menu items	Each menu item should navigate to the correct section	User is successfully redirected to the registration page.	Pass
LP_007	Verify the presence of an informative hero section	N/A	1. Check for the hero section containing tagline and product information	The hero section should be informative and well-formatted	The hero section is displayed correctly with clear, informative content and proper.	Pass
LP_008	Verify broken links on the landing page	N/A	1. Click on all links in the landing page	All links should be functional	All links are functional and navigate correctly.	Pass
LP_009	Verify the speed of landing page loading	N/A	1. Measure page load time	The page should load within 3 seconds	The page loads succesfully within 3 seconds.	Pass
LP_010	Verify accessibility compliance	N/A	1. Run an accessibility test using tools like Lighthouse	The page should pass WCAG accessibility guidelines	The page meets WCAG guidelines with proper contrast alt text, and keyboard accessibility	Pass
2. Login Component						
Test Case ID	Test Case Description	Test Data	Test Steps	Expected Test Result	Actual Test Result	Status Pass/Fail

LG_001	Verify login with valid credentials	Email: john.doe@example.com , Password: SecurePass123	1. Enter valid credentials 2. Click "Login"	User should be logged in successfully and redirected to the dashboard	User logs in successfully and is redirected to the dashboard.	Pass
LG_002	Verify login with incorrect password	Email: john.doe@example.com , Password: WrongPass123	1. Enter incorrect password 2. Click "Login"	"Invalid credentials" error should be displayed	"Invalid credentials" message appears when incorrect details are entered	Pass
LG_003	Verify login with unregistered email	Email: unknown@example.com , Password: SecurePass123	1. Enter unregistered email 2. Click "Login"	"User not found" error should be displayed	"User not found" message appears for unregistered users.	Pass
LG_004	Verify "Remember Me" functionality	Email: john.doe@example.com , Password: SecurePass123	1. Select "Remember Me" 2. Log in 3. Close and reopen browser	User credentials should be pre-filled upon reopening	Credentials are pre-filled upon reopening the login page	Pass
LG_005	Verify password visibility toggle	N/A	1. Enter password 2. Click "Eye" icon to toggle password visibility	Password should be visible when toggled	Password is shown when toggled and hidden when disabled	Pass
LG_006	Verify login attempt limit	Incorrect password entered 5 times	1. Enter incorrect password multiple times	Account should be temporarily locked	Account is locked after several failed attempts.	Pass
LG_007	Verify login with empty fields	N/A	1. Click "Login" without entering credentials	"Fields cannot be empty" message should be displayed	"Fields cannot be empty" message is displayed when submitting empty fields.	Pass
LG_008	Verify redirection to forgot password page	N/A	1. Click "Forgot Password" link	User should be redirected to password recovery page	User is successfully redirected to the Password recovery page	Pass
LG_009	Verify login when account is locked	Locked account credentials	1. Attempt to log in with a locked account	"Your account is locked" message should be displayed	"Your account is locked" message appears after repeated failed login	Pass
LG_010	Verify security headers in login response	N/A	1. Inspect network request for login API	Security headers should be present	Security headers are properly implemented	Pass
3. Registration Component						
Test Case ID	Test Case Description	Test Data	Test Steps	Expected Test Result	Actual Test Result	Status Pass/Fail
RG_001	Verify registration with valid details	Full name: John Doe, Email: john.doe@example.com , Password: SecurePass123	1. Enter valid details 2. Click "Register"	User should be registered successfully	User registration is successful	Pass

RG_002	Verify registration with existing email	Email: johndoe@example.com	1. Enter existing email 2. Click "Register"	"Email already exists" error should be displayed	"Email already exists" message appears when using a registered email	Pass
RG_003	Verify registration with weak password	Password: 123	1. Enter weak password 2. Click "Register"	"Password must be strong" error should be displayed	"Password must be strong" message appears for weak passwords	Pass
RG_004	Verify email format validation	Email: johndoe@com	1. Enter invalid email 2. Click "Register"	"Invalid email format" error should be displayed	"Invalid email format" message appears when entering an incorrect format	Pass
RG_005	Verify mandatory fields	N/A	1. Leave required fields empty 2. Click "Register"	"All fields are required" error should be displayed	"All fields are required" message appears when submitting an incomplete form.	Pass
RG_006	Verify registration with mismatched passwords	Password: Pass123, Confirm Password: Pass456	1. Enter mismatched passwords 2. Click "Register"	"Passwords do not match" error should be displayed	"Passwords do not match" message appears when different passwords are entered	Pass
RG_007	Verify registration with short name	Full name: J	1. Enter short name 2. Click "Register"	"Name must be at least 3 characters" error should be displayed	"Name must be at least 8 characters" message appears when entering a short name.	Pass
RG_008	Verify registration redirection after success	Valid registration data	1. Register successfully	User should be redirected to login page	User is successfully redirected to the login page	Pass
RG_009	Verify CAPTCHA implementation	N/A	1. Attempt registration multiple times	CAPTCHA should appear after repeated attempts	There is No CAPTCHA	NO
RG_010	Verify registration email verification	Valid registration data	1. Register successfully 2. Check email	Verification email should be sent	Verification email is successfully sent.	Pass

4. Forgot Password Component

Test Case ID	Test Case Description	Test Data	Test Steps	Expected Test Result	Actual Test Result	Status Pass/Fail
FP_001	Verify forgot password link functionality	N/A	1. Click on "Forgot Password" link	User should be redirected to the password recovery page	User is Successfully redirected to the password recovery page.	Pass

FP_002	Verify password reset request with valid email	Email: john.doe@example.com	1. Enter registered email 2. Click "Submit"	"Password reset email sent" confirmation should be displayed	"Password reset email sent" message is displayed	Pass
FP_003	Verify password reset request with unregistered email	Email: unknown@example.com	1. Enter unregistered email 2. Click "Submit"	"Email not found" error should be displayed	"Email not found" error is displayed for unregistered emails.	Pass
FP_004	Verify empty email field validation	N/A	1. Leave the email field empty 2. Click "Submit"	"Email field cannot be empty" error should be displayed	"Email field cannot be empty" message is displayed.	Pass
FP_005	Verify email format validation	Email: johndoe@com	1. Enter invalid email 2. Click "Submit"	"Invalid email format" error should be displayed	"Invalid email format" message is displayed when entering an incorrect format.	Pass
FP_006	Verify expired reset link handling	Expired token	1. Click on an expired reset link	"Reset link expired" error should be displayed	"Reset link expired" message is displayed when using an old link	Pass
FP_007	Verify password reset link delivery	Registered email	1. Request a password reset 2. Check email inbox	Reset link should be received in email	Password reset email is received successfully.	Pass
FP_008	Verify multiple reset requests for the same email	Same email requested multiple times	1. Submit password reset request multiple times	System should send only one reset email within a given timeframe	System sends only one reset email per allowed timeframe	Pass
FP_009	Verify redirection to login page after reset request	N/A	1. Submit password reset request 2. Click "Back to Login"	User should be redirected to the login page	User is Successfully redirected to login page.	Pass
FP_010	Verify security of the reset link	N/A	1. Check reset link structure	Reset link should contain a secure token and expire after a set duration	The reset link contains a secure token and expire as expected	Pass

5. Reset Password Component

Test Case ID	Test Case Description	Test Data	Test Steps	Expected Test Result	Actual Test Result	Status Pass/Fail
RP_001	Verify password reset with valid data	Password: SecurePass123	1. Click reset link 2. Enter new password 3. Confirm password 4. Click "Reset"	Password should be reset successfully	Password reset is successful	Pass
RP_002	Verify password reset with mismatched passwords	Password: Pass123, Confirm Password: Pass456	1. Enter mismatched passwords 2. Click "Reset"	"Passwords do not match" error should be displayed	"password do not match" message is displayed	Pass

RP_003	Verify password reset with weak password	Password: 12345	1. Enter weak password 2. Click "Reset"	"Password must be strong" error should be displayed	"Password must be strong" message appears for weak password	Pass
RP_004	Verify expired reset token	Expired token	1. Use an expired reset link	"Reset link expired" error should be displayed	"Reset link expired" message appears when using an old link	Pass
RP_005	Verify password reset with empty fields	N/A	1. Click "Reset" without entering any password	"Password field cannot be empty" error should be displayed	"Password field cannot be empty" message appears.	Pass
RP_006	Verify login after successful password reset	New password: SecurePass123	1. Reset password 2. Try logging in with new password	User should be able to log in with the new password	User logs in successfully with the new password.	Pass
RP_007	Verify security of reset request	N/A	1. Inspect network request for reset API	Password should not be exposed in network requests	Password is encrypted and not exposed in network logs.	Pass
RP_008	Verify the reset password page layout	N/A	1. Open reset password page 2. Check UI elements	Page should be user-friendly and clear	Page is intuitive, user-friendly, and well-formatted.	Pass
RP_009	Verify auto-logout after password reset	N/A	1. Reset password while logged in 2. Try using old session	User should be logged out and required to log in again	User is logged out and must log in again after resetting the password.	Pass
RP_010	Verify redirection after successful reset	N/A	1. Reset password 2. Observe the next page	User should be redirected to login page	User is successfully redirected to the login page	Pass

6. Orders Component

Test Case ID	Test Case Description	Test Data	Test Steps	Expected Test Result	Actual Test Result	Status Pass/Fail
OR_001	Verify placing an order with valid data	Product: Laptop, Supplier ID: supplier1234, Quantity: 5, Order Value: 2500	1. Log in as admin 2. Navigate to Orders 3. Click "Place Order" 4. Enter order details 5. Submit	Order should be placed successfully and visible in the order list	Order was placed successfully and is visible in the order list	Pass
OR_002	Verify order placement with missing details	Missing supplier ID	1. Leave supplier ID blank 2. Click "Submit"	"Supplier ID is required" error should be displayed	Error message displayed when supplier ID was missing	Pass

OR_003	Verify order status update	Change status from "Confirmed" to "Delivered"	1. Log in as admin 2. Navigate to Orders 3. Select an order 4. Update status 5. Save changes	Order status should be updated successfully	Order status updated successfully	Pass
OR_004	Verify order cancellation	Valid Order ID	1. Select an order 2. Click "Cancel Order" 3. Confirm action	Order should be removed from the active list	Completed/Canceled order removed from the active list	Pass
OR_005	Verify pagination in the orders list	Large number of orders	1. Navigate to Orders 2. Scroll down 3. Click "Next Page"	Orders should be paginated correctly	Order were paginated correctly	Pass
OR_006	Verify search functionality in orders	Order ID: 12345	1. Enter Order ID in search bar 2. Click "Search"	Order details should be displayed	Order details displayed correctly when selected	Pass
OR_007	Verify sorting functionality	Sort by "Order Date"	1. Click "Sort by Date" 2. Check sorted list	Orders should be displayed in correct order	Orders were displayed correctly when selected	Pass
OR_008	Verify error handling for invalid order data	Negative quantity value	1. Enter negative quantity 2. Click "Submit"	"Quantity cannot be negative" error should be displayed	Error message displayed when negative quantity was entered.	Pass
OR_009	Verify stock update after order placement	Product: Laptop, Initial Stock: 10, Ordered: 2	1. Place order for Laptop 2. Check inventory stock	Inventory stock should decrease by ordered quantity	Inventory stock decreased by the orderd quantity	Pass
OR_010	Verify notification for delayed orders	Order delayed by supplier	1. Change order status to "Delayed" 2. Check notifications	Notification should be triggered for delayed order	Notification triggered for delayed orders	Pass

7. Suppliers Component

Test Case ID	Test Case Description	Test Data	Test Steps	Expected Test Result	Actual Test Result	Status Pass/Fail
SP_001	Verify adding a new supplier	Supplier Name: XYZ Ltd, Contact: 9876543210	1. Log in as admin 2. Navigate to Suppliers 3. Click "Add Supplier" 4. Enter details 5. Save	Supplier should be added successfully	Supplier was added successfully	Pass
SP_002	Verify editing supplier details	Update contact number	1. Select a supplier 2. Click "Edit" 3. Update contact 4. Save changes	Supplier details should be updated successfully	Supplier details updated Successfully	Pass

SP_003	Verify deleting a supplier	Existing supplier	1. Select a supplier 2. Click "Delete" 3. Confirm action	Supplier should be removed	Supplier was removed Successfully.	Pass
SP_004	Verify searching for a supplier	Supplier Name: XYZ Ltd	1. Enter supplier name in search bar 2. Click "Search"	Supplier should be displayed	Supplier details were displayed correctly	Pass
SP_005	Verify duplicate supplier entry prevention	Existing supplier details	1. Try adding an existing supplier	"Supplier already exists" error should be displayed	Error message displayed when attempting to add an existing supplier	Pass
SP_006	Verify sorting suppliers	Sort by "Name"	1. Click "Sort by Name" 2. Check sorted list	Suppliers should be sorted alphabetically	Suppliers were sorted alphabetically.	Pass
SP_007	Verify supplier pagination	Large number of suppliers	1. Navigate through supplier pages	Pagination should work correctly	Error message displayed when attempting to add an existing supplier.	Pass
SP_008	Verify low stock notifications linked to suppliers	Low stock threshold triggered	1. Check supplier linked to low-stock products	Notification should be sent to the supplier	Notification was sent to the supplier successfully.	Pass
SP_009	Verify supplier product linking	Supplier: XYZ Ltd, Product: Laptop	1. Check supplier details 2. Verify listed products	Products supplied by supplier should be listed	Products supplied by the supplier were displayed correctly.	Pass
SP_010	Verify supplier contact details validation	Invalid email format	1. Enter invalid email 2. Click "Save"	"Invalid email format" error should be displayed	Error message displayed when entering an invalid email format.	Pass

8. Reports Component

Test Case ID	Test Case Description	Test Data	Test Steps	Expected Test Result	Actual Test Result	Status Pass/Fail
RP_001	Verify sales report generation	Date range: Last 30 days	1. Select date range 2. Click "Generate Report"	Sales report should be displayed	Sales report was displayed successfully.	Pass
RP_002	Verify export functionality for reports	Format: PDF	1. Generate a report 2. Click "Export" 3. Select format	Report should be downloaded successfully	Report was downloaded successfully.	Pass
RP_003	Verify purchase report generation	Date range: Last 7 days	1. Generate purchase report	Report should display correct data	Report displayed correct data.	Pass
RP_004	Verify graphical representation of reports	N/A	1. Open reports section 2. Check graph visualization	Data should be displayed in graphical format	Data was displayed in graphical format.	Pass
RP_005	Verify report filtering options	Filter: Product Category	1. Apply filter on reports	Report should display filtered data	Report displayed filtered data correctly.	Pass

RP_006	Verify report accuracy	Cross-check sales data	1. Compare report data with actual transactions	Data should match actual transactions	Report data matched actual trasactions.	Pass
RP_007	Verify access control for reports	Role: Non-admin	1. Log in as a non-admin user 2. Try accessing reports	Unauthorized users should be restricted	unauthorized users were restricted from accessing the report.	Pass
RP_008	Verify monthly comparison feature	Compare sales for Jan & Feb	1. Generate a report with month-wise comparison	Comparative report should be displayed	Comparative report was displayed successfully.	Pass
RP_009	Verify performance metrics in reports	N/A	1. Check revenue and profit margins in reports	Key metrics should be correctly displayed	Key metrics were displayed correctly.	Pass
RP_010	Verify report generation time	Large data set	1. Generate a detailed report 2. Measure loading time	Report should be generated within an acceptable timeframe	Report was generated within an acceptable timeframe.	Pass

--	--	--	--	--	--	--

9. Inventory Component

Test Case ID	Test Case Description	Test Data	Test Steps	Expected Test Result	Actual Test Result	Status Pass/Fail
INV_001	Verify adding a new product to inventory	Product: Laptop, Category: Electronics, Cost: 500, Quantity: 10	1. Log in as admin 2. Navigate to Inventory 3. Click "Add Product" 4. Enter details 5. Submit	Product should be added successfully	Product was added successfully.	Pass
INV_002	Verify editing an existing product	Modify Quantity: 20	1. Select product 2. Click "Edit" 3. Update quantity 4. Save changes	Product details should be updated successfully	Product details were updated successfully.	Pass
INV_003	Verify deleting a product	Product: Mouse	1. Select product 2. Click "Delete" 3. Confirm action	Product should be removed	Product was removed successfully.	Pass
INV_004	Verify low-stock alert functionality	Product: Phone, Threshold: 5, Current Stock: 4	1. Check Inventory Dashboard	Low-stock alert should be displayed	Low-stock alert was displayed correctly.	Pass
INV_005	Verify inventory search functionality	Product: Laptop	1. Enter product name in search bar 2. Click "Search"	Product should be displayed	Product was displayed correctly in the inventory.	Pass
INV_006	Verify inventory sorting by quantity	Sort: Low to High	1. Click "Sort by Quantity" 2. Check sorted list	Products should be sorted correctly	Products were sorted decresed correctly by ordered quantity.	Pass

INV_007	Verify stock update after order fulfillment	Product: Laptop, Initial Stock: 10, Ordered: 2	1. Place order 2. Check inventory stock	Inventory stock should decrease by ordered quantity	Inventory stock decreased correctly by ordered quantity.	Pass
INV_008	Verify bulk upload functionality	Bulk product data file	1. Upload CSV file with product details 2. Click "Submit"	Products should be added to inventory	Products were added to inventory successfully.	Pass
INV_009	Verify product expiration tracking	Product: Milk, Expiry: 2025-03-30	1. Check Inventory Dashboard	Expiring products should be highlighted	Expiring products were highlighted as expected.	Pass
INV_010	Verify inventory reports accuracy	N/A	1. Generate an inventory report 2. Compare with actual data	Report should match database records	Inventory report matched database records.	Pass

10. Dashboard Component

Test Case ID	Test Case Description	Test Data	Test Steps	Expected Test Result	Actual Test Result	Status Pass/Fail
DB_001	Verify dashboard loading	N/A	1. Log in as admin 2. Navigate to Dashboard	Dashboard should load with correct data	Dashboard loaded with correct data.	Pass
DB_002	Verify sales overview graph	Monthly sales data	1. Check sales overview section	Sales graph should display correct data	Sales graph displayed correct data.	Pass
DB_003	Verify purchase summary graph	Monthly purchase data	1. Check purchase summary section	Purchase graph should display correct data	Purchase graph displayed correct data.	Pass
DB_004	Verify stock summary display	Total stock count: 200	1. Check inventory section	Stock count should match inventory	Stock count matched inventory records.	Pass
DB_005	Verify top-selling products list	N/A	1. Check "Top Selling Products" section	Best-selling products should be listed	Best-selling products were displayed as expected.	Pass
DB_006	Verify low-stock products section	Products below threshold	1. Check "Low Stock" section	Low-stock products should be listed	Low-stock products were displayed as expected.	Pass
DB_007	Verify dashboard responsiveness	N/A	1. Open dashboard on mobile, tablet, and desktop	Dashboard should adjust correctly	Dashboard adjusted correctly based on selected criteria.	Pass
DB_008	Verify date filtering in dashboard	Date range: Last 7 days	1. Apply date filter 2. Observe data change	Data should be filtered correctly	Data was filtered correctly based on selected criteria.	Pass
DB_009	Verify error handling for missing data	No recent sales data	1. Check sales section	Dashboard should display "No data available"	Message displayed correctly when no data was available.	Pass
DB_010	Verify dashboard load time	N/A	1. Measure dashboard load time	Dashboard should load within 3 seconds	Dashboard loaded within 3 seconds	Pass

11. Profile Component						
Test Case ID	Test Case Description	Test Data	Test Steps	Expected Test Result	Actual Test Result	Status Pass/Fail
PR_001	Verify profile details display	Logged-in user details	1. Log in 2. Navigate to profile	Profile information should be displayed correctly	Profile information was displayed correctly.	Pass
PR_002	Verify profile edit functionality	New contact number: 9876543210	1. Click "Edit Profile" 2. Update details 3. Save changes	Profile should be updated successfully	Profile Was updated successfully.	Pass
PR_003	Verify profile picture upload	Image file	1. Click "Change Profile Picture" 2. Upload image 3. Save changes	Profile picture should be updated	Profile picture was updated successfully.	Pass
PR_004	Verify email update restriction	New Email: test@example.com	1. Try to update email	System should prevent email change or require verification	System prevented email change or required verification.	Pass
PR_005	Verify invalid phone number format	Phone: abc12345	1. Enter invalid phone 2. Click "Save"	"Invalid phone number" error should be displayed	Error message was displayed when entering an invalid phone number.	Pass
PR_006	Verify address update	New Address: 456 New Street	1. Edit profile 2. Update address 3. Save changes	Address should be updated successfully	Address was updated successfully.	Pass
PR_007	Verify session expiration handling	Session expired	1. Keep profile page open for long duration 2. Try editing	User should be logged out and redirected	User was logged out and redirected as expected.	Pass
PR_008	Verify password change functionality	Old Password: SecurePass123, New Password: NewPass456	1. Click "Change Password" 2. Enter details 3. Save	Password should be updated successfully	Password was updated successfully.	Pass
PR_009	Verify security of profile data	N/A	1. Inspect network request 2. Check data encryption	Profile data should be securely transmitted	Profile data was securely transmitted.	Pass
PR_010	Verify redirection after profile update	N/A	1. Edit profile 2. Save changes	User should be redirected to profile page with success message	User was redirected to profile page with a success message.	Pass
Shop related test cases						
Test Case ID	Test Case Description	Test Data	Test Steps	Expected Test Result	Actual Test Result	Status

TC001	Verify product listing on shop page	N/A	Navigate to Shop Page	All available products are displayed with image, name, and price	All Available Products are displayed with images, name and price	Pass
TC002	Verify product detail navigation	Click on product card	Click on a product image or title	Redirected to product detail page	Clicking a Product redirects to its details page.	Pass
TC003	Add product to cart from shop page	Product ID	Click "Add to Cart" button on a product	Product is added to cart and cart icon updates	Product is Successfully added to the cart, and the cart icon updates correctly.	Pass
TC004	View cart items from navbar	N/A	Click on cart icon	Cart page opens showing added products	Cart Page displays the added Products with accurate details.	Pass
TC005	Update product quantity in cart	Quantity = 2	Increase quantity using "+" button in cart	Product quantity updates and total price changes	Updating product quantity reflects correct total price.	Pass
TC006	Remove product from cart	Click on delete icon	Click delete/trash icon beside a product in cart	Product is removed and total amount is updated	Product is removed from the cart	Pass
TC007	Check subtotal and total price calculation	2 items, each ₹500	Add 2 products, view subtotal and total	Subtotal and total price should match the sum of product prices	Subtotal and total match the sum of product prices.	Pass
TC008	Checkout with empty cart	N/A	Try accessing checkout without any cart items	Should redirect to cart or show error	Redirects to cart or shows appropriate error when necessary.	Pass
TC009	Checkout with valid inputs	Valid name, address, number, email	Fill in all billing fields correctly and place order	Order should be placed successfully	Order Placement completes successfully without issues.	Pass
TC010	Submit checkout form with empty fields	Blank fields	Click "Place Order" without filling any billing info	Show validation messages for required fields	Validation messages appear for all required fields.	Pass
TC011	Validate phone number format in checkout	"12345"	Enter invalid phone number and submit	Should display "Invalid phone number" message	Displays "Invalid phone number" message for incorrect input.	Pass
TC012	Validate email format in checkout	"test@"	Enter invalid email and submit	Should display "Invalid email address" message	Displays "Invalid email address" message for incorrect input.	Pass
TC013	Display product image in checkout summary	N/A	Go to checkout after adding item	Product image should appear beside product title	Product image is shown beside the product title.	Pass
TC014	Verify shipping fee is ₹0	N/A	Go to checkout and observe shipping fee	Shipping fee should show ₹0	Shipping fee displays as ₹0	Pass

TC015	Place order and verify success message	Valid data	Complete checkout process	Confirmation or order success message is shown	Confirmation or success message is displayed after order placement.	Pass
TC016	Cart persists after page reload	Product in cart	Add item to cart, refresh page	Product should still be in cart	Product remains in cart if the page is refreshed.	Pass
TC017	Cart is empty after order is placed	Add items and checkout	Place order successfully	Cart should reset or clear automatically	Cart reset or clears after successful order.	Pass
TC018	Product price formatting	₹60500.00	View product prices in cart/checkout	Prices should be shown with ₹ and 2 decimal places	prices are shown with rs symbol and formatted to two decimal places.	Pass
TC019	Check cart icon count updates correctly	Add 2 items	Add products to cart and observe cart icon badge	Badge should reflect total item count	Badge reflects the total number of items in the cart accurately.	Pass
TC020	Verify invalid product doesn't break cart functionality	Remove backend product manually	Try adding unavailable product	Should show error like "Product not available" and not break cart	Shows "Product not available" error gracefully without breaking the cart.	Pass
